National health care — decision day

*A day to inspire, educate & empower one another
about the importance of Advance Care Planning*

WHAT IS ADVANCE PLANNING?

Advance Care Planning is an opportunity to share your personal values, life goals & preferences regarding future medical care.

It's a gift to give your loved ones who might otherwise struggle to make these choices about your care during a medical emergency.

“ I have a Health Care Directive not because I have a serious illness, but because I have a family. ”

- Ira Byock, MD, FAAHP & Author

Pick up your Advance Care Planning paperwork today!
